Klein Tools® Introduces Disposable N95 Respirators for Convenient Protection

May 31, 2023 (Lincolnshire, Ill.) – Klein Tools (www.kleintools.com), for professionals since 1857, introduces the latest addition to our growing line of personal protective equipment, N95 Respirators featuring a convenient, disposable design with a lightweight construction and a valve for easily breathing and a cool environment inside the respirator.

N95 Disposable Respirators (Cat. Nos. 6044010 and 604403)

- Conforms to 42CFR Part 84, N95 Class, NIOSH approved
- Use while grinding, sanding or processing wood, minerals and other substances
- Elastic head strap for better fit & flexibility
- Lightweight construction; contoured fabric nose piece
- Available in two different packages:
 - 3-pack/blister pack ([Cat. No. 604403](#))
 - 10-pack/box ([Cat. No. 6044010](#))

“The new N95 Disposable Respirator efficiently and effectively provides the wearer with N95 particulate protection without compromising comfort,” says Chander Duchaine, product manager at Klein Tools. “This respirator offers a convenient, disposable design with a lightweight construction and contoured fabric nose piece for a better seal, aiding in a reduction of safety glasses fogging. The N95 respirator can be used for grinding, sanding, or processing wood, minerals and certain other substances, and protects against a wide range of dust particles, making it great for DIY projects as well as commercial applications.”
