## New Folding Cutter from Klein Tools® Built for Heavy Duty Use and Stable Cutting

**Sep. 26, 2023 (Lincolnshire, Ill.)** Klein Tools ([www.kleintools.com](http://www.kleintools.com)), for professionals since 1857, introduces the Folding Insulation Cutter, with a serrated stainless steel blade that cuts through foam and fiberglass, and also folds back into the comfort-grip handle for added protection.

### **Folding Insulation Cutter (Cat. No. 31733)**

- Serrated blade easily saws through foam and fiberglass insulation
- Folded blade keeps cutter from piercing through tool pouches and bags
- Blade made from durable 3CR13 stainless steel for heavy duty use
- Heavy duty construction is as sturdy as fixed blade insulation knives
- Lockback mechanism secures blade open
- Comfortable, non-slip grip
- Lanyard hole for tethering

Cutting through heavy-duty materials is often a requirement on the jobsite, and professionals need a tool that

new Folding Insulation Cutter (Cat. No. 31733) is a heavy-duty tool that cuts through foam and fiberglass insulation. The blade is made of 3CR13 stainless steel and is serrated for easy cutting. The blade folds back into the handle for protection and storage. The handle has a non-slip grip and a lanyard hole for tethering. The cutter is built for heavy-duty use and is as sturdy as fixed blade insulation knives. The lockback mechanism secures the blade open. The cutter is comfortable to use and has a non-slip grip. The lanyard hole is for tethering.
